

RECYCLE YOUR COMPACT DISCS

Please help prevent unwanted CDs, DVDs and their packaging from entering landfills and incinerators.

Not recycling discs is bad for the environment...

Each year, billions of CDs and DVDs are manufactured, while millions of discs end up in landfills and incinerators. This is bad for our environment.

Recycling compact discs helps control pollution, conserve natural resources and slow global warming.

If you use, sell, collect or promote compact discs, it is important to know how to recycle them.

Learn how at: www.cdrecyclingcenter.com

Start a CD recycling program today.
Please spread the word.

All pieces must be disassembled
